

KONSTANTIN CHAYKIN
RUSSIAN EXCLUSIVE WATCHCRAFT

Minions

The new Minions watch is an absolute wristmon, and a piece of haute horlogerie. When the design was created and approved, Konstantin Chaykin specially redesigned his joker indication module. In fact, this module has been reimagined, and only the disc display of hours, minutes and the moon phase indicator, as well as the general concept of the dial's layout and controls, remain unchanged.

Chaykin's wristmons stand out because of the impressively large size of the hour and minute indicators (inspired by the character's eyes) in relation to the size of the dial. However, the new Minions watch surpasses them in this parameter. Konstantin Chaykin is sure that his new Minions watch will further enhance the emotionality of the wristmons' line. No one will remain indifferent and unmoved.
